Hiring Manager

[Company Name]

[Company Address]

Dear Hiring Manager,

I am writing to express my interest in a software development or machine learning internship position at your esteemed organization. I am currently pursuing a Bachelor of Technology in Computer Science and Engineering from Graphic Era Hill University, with a strong academic record (CGPA 9.0) and hands-on experience in developing applications and machine learning models.

Through various academic projects such as a C++ based Walmart Shopping Cart Application, a Titanic Disaster Survival Prediction using ML algorithms, and an Amazon Clone website using HTML and CSS, I have honed my skills in programming, object-oriented design, and data analysis. Additionally, I have solved over 250 problems on LeetCode, which has further sharpened my problem-solving and algorithmic thinking.

I bring a solid foundation in programming languages like C++, Python, and Java, as well as exposure to Git,

Linux, and front-end technologies. My certifications in Machine Learning, Cybersecurity, and Presentation Skills reflect my commitment to continuous learning and professional growth.

I am enthusiastic about contributing to a team that values innovation and impact. I am confident that my technical skills, passion for development, and collaborative attitude will make me a strong asset to your organization. I welcome the opportunity to discuss how I can contribute to your ongoing projects and goals.

Thank you for considering my application. I look forward to the possibility of an interview.

Sincerely,

Aditya Negi
